

DIY | Knee Wall | R-16, R-19

Reflectix® Installation Instructions

1. Reflectix® Insulation
2. R-13 Fiberglass Batt
3. Vapor Barrier (Polyethylene)
if Code Required
4. Interior Panel (Sheetrock)

Tools Required:

Safety Glasses
Staple Gun
Tape Measure
Utility Knife/Scissors

Recommended Products:

- Reflective/Bubble/Bubble/Reflective - Roll: BP24025 (24"x 25')
- Staple Tab, Reflective/Bubble/Bubble/Reflective - Roll: ST16025 (16"x 25'), ST24025 (24"x 25')

Installation Instructions:

(There are 2 methods with varying levels of benefit)

1. Product Installed in the Back of the Knee Wall Cavity - R-16 and a Radiant Reflector (with R-13 Fiberglass Batt)

- Construct Knee Wall per Building Code.
- Prior to installing fiberglass batts, measure the inside height of the knee wall cavity.
- Precut the Reflectix® to this measured length minus 1/2".
- Start at the inside top of the first cavity.
- If utilizing the Reflective/Bubble/Bubble/Reflective, Staple Tab Product, staple the tab of the product to the side back corner) of the stud and continue downward stapling every 3" to 4" - Repeat on opposite stud - The plane created by the product should be parallel to the back side faces of the studs - There should be a continuous 1/2" air gap across the bottom of the cavity.
- Install Fiberglass Batt per Manufacturer's Instructions.
- Install a Vapor Barrier on the inside of the Knee Wall if your Building Code dictates.
- Finish interior of Knee Wall.

2. Product Installed in the Back of the Knee Wall Cavity - R-19 and a Radiant Reflector (with R-13 Fiberglass Batt and 0.75" furring (on the back of the Knee Wall))

- Prior to placing the Knee Wall and nailing it to the floor and rafters, attach a 1"x 2" (nominal) furring strip to the back of each Knee Wall Stud, Header and Footer.
- Install Reflectix® per instruction in Method #1 (above).

Review These Important Safety Guidelines Prior to Installation:

- **ALWAYS** check local building codes before installing Reflectix®.
- **ALWAYS** check the area you are insulating and make any needed repairs. Any worn wiring should be replaced before you begin installing Reflectix®.
- **ALWAYS** make sure work areas are well ventilated and well lighted.
- **ALWAYS** use eye protection when operating a staple gun.
- **ALWAYS** use caution and common sense when using a staple gun. Be aware of where electrical wiring is located. Stapling into a wire can cause severe shock or death. **NEVER** staple into electrical wiring.
- **ALWAYS** be careful when working with large pieces of Reflectix® on windy days.
- When installing Reflectix® on bright sunny days, it is best to wear sun glasses.
- Do not work in areas such as attics when temperatures are too hot.
- Visit our website at www.reflectixinc.com for additional product and installation information.

Please Note: The intention of these Installation Instructions and 3-D renderings are for the sole purpose of illustrating the correct location and relative position of the Reflectix® products in specific building assemblies. The correct construction methods and techniques are the responsibility of the installer or contractor. The methods outlined are recommendations on location of the Reflectix® products as a guideline. There are no claims on the part of Reflectix, Inc. that these building assemblies are finite standards or meet building code requirements (as they can vary by region).
